ALL-HBALING CIMTMENT

TIPE preceeding figure is given to repre-sent the Insensible Perspiration. It is the great execuation for the impurities of the It will be noticed that a tidek cloudy mist imues from all points of the surface, which indicates that this perspiration flow uninterruptedly when we are in health, but ceases when we are sick. Lafe cannot be enstained without it. It is thrown off from the blood and other juices of the body, and disposes by this means, of nearly all the im-purities within us. The language of Sarp-ture is, "the blood is the life." If it ever benomes impure, it may be traced directly to the stoppage of the mensible perspiration.
Thus we see, all that is necessary when the blood is stagnant, or infected, is to oven the pores, and it relieves itself from all impurity instantly. Its own heat and vitality are sufficient, without own particle of medicine, except to open the pores upon the surface -Thus we see the folly of taking so much in-ternal remedies. All gractitioners, however direct their efforts to restore the insensible peripiration. The Thomsonian, for instance steams, the Hydropathist shrouds us in wet

insensible perspiration, we will state that the learned Dr. Lewenbock, ascertained that five-eights of all we receive in the stomach, passes off by this means. In other words, if we eat and drink eight pounds per day, we evacuate five pounds of it by the insensible perspiration.

This is none other than the used up parti cles of the blood, and other juices giving place to the new and fresh ones. To check this, therefore, is to retain in the system five eights of all the virulent matter that nature omands should leave the body.

By a sudden transition from heat to cold. the pores are stopped, the perspiration cesses, and disease begids at once to develope itself. Hence, a stoppage of this flow of the juices, originates so many complaints. Nine tenths of the whole die from diseases induced

by a stoppage of the insensible perspiration. Let me ask, new, every candid mind, what course seems the most reasonable to pursue, to unstop the pores, after they are closed.— Would you give physic to unstop the pores ! Or would you apply something that would do this upon the sueface, where the clogging acwho makes any external application to effect it. Under these circumstances, I present to It has power to restore permiration on the feet, on the head, around old sores, upon the chest, in short, upon any part of the body, whether diseased slightly or severely. It has power to cause all external sores, acrofwounds, to discharge their putrid matter and then heals them. It is a remedy that sweeps off the whole catalogue of cutaneous disorders, and Testores the entire cuticle to its healthy functions. It is a remedy that forbids the necessity of so many and deleteri ous drugs taken into the stomach I have used it for the last fourteen years for all diseases of the chest, consumption, liver, in volving the utmost dangar and responsibility and I declare before Heaven and man, that not in one single case has it failed to benefit when the patient was within the reach of mortal means.

the various preparations bearing the name East Pourrage, Vi. Aug 10, 1846. Mesers Sands—In the Spring of 1841 I had the typhus fever, with which I suffered the most intense pain, and when I recovered from that I was attacked with the spinal complaint and inflamed sore throat. This continued until June, 1843, when my throat cough, and my face was covered with scro-fulous scres. I cannot describe what I suffered for five years, three of which I was confined to my bed and could not act up at all. During this period I received no benefit from the various prescriptions of different Physicians, and had nearly given up all hopes of ever being any better. At this time I was induced to try your Sarsaparille, from the many remarkable curse it had performed; and strange as it may appear, the first bottle effected a sensible change. By continuing its use my health has so much improved that I can now not only sit up, but walk, and I fully believe, with the blessing of Providence, that it will affect a perfect cure.

Yours, very truly, ADELINE STABLEY. The following testimonial from the Agent to the value of the Saraaparilla in a case of physicians, and to all others, McAlister's Leprosy, will be read with interest by al All-Healing Outment or the World's Safee. similarly afflicted :

BEATER, Pike Co. Ohio, Sept. 7, 1846. A. B. & D. Sands: Genta.—A man near bere used six bottles of your valuable Sarsaparilla for the Larmony, and has received more benefit from it than all other remedies combined for six years past. It restored a hand, leg and foot from a situation that no person would have known that they belonged to a human body, as all appeared to be one mass of putrifying sore. His hand and ever, and his lepresy cured. He intends using a few more bottles to permanently establish his bealth.

G. W. RAYNOLIN FURTHER TESTIMONY .- The following is an extract from a letter received from Rev. William Gallusha:

BRRKBHIRE, VL., Oct. 29, 1845. Mesers Sands : I have been afflicted with severe pain in my side, occasioned by fering at times what language canno convey, but since taking your Sarsaparilla I have been greatly relieved so much so that I have been able to attend to my business, and preach occasionally for the last fifteen months. I wholly discarded all other medicine, and thoroughly tried the Sarsaparilla which I can recommend in truth and sincer ity to all those who are in any way afflicted with any species of scrofulous complaints There have been some remarkable cures ef fected by its use in this vicinity. Shaw, by the use of air bottles, was restored to better health than she had before enjoyed for ten years, and Mrs W. Stevens, who had been severely afflicted with Esysipelas, was entirely cured by the use of a few bottles.
